

FORT CAMPBELL ENVIRONMENTAL HANDBOOK
Guidance & Instruction
POST UNITS INVOLVED IN ASBESTOS AND LEAD-BASED PAINT MANAGEMENT

As related to asbestos and lead-based paint, besides PWBC, other Post Units have a direct interplay with Post activities:

- a. The Installation Medical Authority (Preventative Medicine) will perform workplace sampling and analysis, as prescribed by OSHA, where asbestos is used in recurring industrial operations. Inform individuals occupationally exposed to asbestos of the exposure and of the hazard associated with that exposure. Lead paint health concerns will also be addressed by Preventative Medicine.
- b. The Post Safety Office will receive and investigate asbestos and lead-based paint related employee complaints of unsafe working conditions. Safety personnel will refer any known or suspected asbestos or lead-based paint related problem detected during safety inspections or observations to the PWBC/Environmental Division.
- c. The Directorate of Contracting (DOC) will provide contractual support for surveying and abatement and contract enforcement.
- d. The Defense Reutilization and Marketing Office (DRMO) will dispose of noncontract-generated ACM and lead waste.
- e. The Staff Judge Advocate (SJA) is available to help ensure regulatory compliance.
- f. Public Affairs Office (PAO) is responsible for interfacing with the media and general public concerning any asbestos or lead paint related incident. Additionally, PAO is responsible for disseminating information, as forwarded by PWBC or the above Units, to post personnel.

For additional guidance and information, and answers to your questions, contact PWBC Environmental Division, 798-9637/9597.
